ISS Windows

Integrated Security & Style

ISS Windows integrated shutter system adds value, style and security to modular, jackleg and mobile structures, as well as conventional brick buildings - including refurbishments and new builds.

Previously worlds apart, you can now have style and security, and add value to your buildings at a low cost. As a result, you'll sell more and make more.

Brick clad building

Jackleg building

Modular building

Solely available from ISS Windows in the UK and Ireland, the integrated shutter system provides a stylish and highly secure solution for commercial and public sector environments - including schools, offices, factories, airports, health centres and domestic buildings.

Design Features

- > Zero-zinc-emission uPVC frame
- > Kömmerling uPVC profile
- > Powder-coated aluminium frame option
- > Integrated robust roller shutter
- > Low emissivity K-Glass double-glazing
- > Tilt & turn window opening system
- > Sliding window opening option (Special order)
- > Trickle vent
- > Stylish and sturdy window furniture
- > Pulley cord shutter control
- > Sliding-bolt locking mechanism
- > Operated manually from inside the building

The Modular & Portable
Building Association Ltd

Security

The system's robust design and user-friendly features provide a high level of security - deterring arson, vandalism and theft.

- > Integrated roller shutter system
- > Controlled and locked internally
- > Permanent building appearance

Eco-friendly

K-Glass double-glazing provides energy efficiency benefits - reducing solar gain and heat loss, while the external solar reflective shutter protects against solar gain and glare.

- > Keep cooler in summer
- > Prevent heat loss in winter
- > Reduce energy costs

Design

The integrated double-glazed window and shutter system fits seamlessly within a modular housing - creating a smart and aesthetically pleasing building.

- > Seamless integrated design
- > Fits 54 to 156 mm thick walls
- > Adds value to building

Easy to maintain

Swappable component parts makes it easy to repair or replace items, while the tilt and turn window system enables safe and effective cleaning from inside the building.

- > Cost-effective maintenance
- > Easy to clean from inside
- > Safe working environment

Easy to use

The manually operated internal control and lock system enables occupants to quickly and easily raise, lower and lock the shutters, and open or close the windows from inside the building - providing a safe, secure and easy to use system.

- > Manual shutter control
- > Tilt & Turn / Sliding windows
- > Health and Safety benefits

Compliant

The integrated system is compliant with building and health and safety regulations - providing a safe, secure and energy efficient building.

- > Environmentally sound
- > Building Regulations compliant
- > Health and Safety compliant
